

to sleep naked. A UN official was denied a private meeting with Manning to investigate his treatment.

To most human rights advocates and legal experts around the world, the treatment of Bradley Manning amounts to torture. Now the U.S. government has **moved Bradley Manning to Fort Leavenworth** in Kansas.

To many of us, Manning is a hero if, as the government charges, he leaked, he leaked documents and the Collateral Murder video which confirm the illegitimacy and immorality of the U.S. wars and occupations of Iraq and Afghanistan, and the U.S. government's widening war into Pakistan and Yemen. It is not a crime to expose the crimes committed by one's own government, in fact, it is **the duty of any soldier** who witnesses such crimes. But war crimes like the ones exposed in the WikiLeaks documents ARE crimes.

**New documents on Guantanamo** were released in April 2011 which reveal that most of the detainees were held indefinitely without there ever being any evidence against them of wrong doing. Most of them never had a hearing. Many were **tortured** and forced to confess to crimes they did not commit, and at other times they were forced to point fingers at one another in order to make the torture stop.

The treatment of the people held at Guantanamo is strikingly similar to the treatment of Bradley Manning. And in a sad twist of fate, Manning, who allegedly blew the whistle on these crimes, now sits in prison while Obama flatly stated that "he broke the law" at a **San Francisco fund raiser** for his re-election campaign. Many say these comments constitute "**unlawful command influence.**"

Sometime this fall, Manning will have a military trial on 22 charges including "Aiding the enemy by indirect means," for which a conviction could result in the death penalty or life in prison.

**The real crimes – war crimes – must stop and  
the real war criminals must be prosecuted!**

***BRADLEY MANNING MUST BE FREED.***
