KILLER DRONES are the most widely used, frontline weapon of the U.S. empire – remotely controlled, without accountability, illegal and hated around the world.

Since 2001 more than 7,000 primarily brown and black impoverished people, mostly Muslim, have been slaughtered by U.S. drones without due process in geopolitical wars, including control over of oil, gas, and/or minerals, in Afghanistan, Pakistan, Yemen, Somalia, Iraq, Syria, Libya, and the Philippines.

Each drone attack sows seeds of violence against the United States.

Tragically, President Barack Obama is responsible for the vast majority of drone killings, which are also supported by Hillary Clinton.
